

Alex Lee Contact: alex.lee@email.com

Professional Summary Data Scientist with a passion for **deep learning** and **Python** programming. Experienced in data science projects from data ingestion and **feature engineering** to model building and validation.

Technical Skills

- **Languages:** Python
- **Libraries:** Scikit-learn, NumPy, Pandas, TensorFlow
- **Tools:** SQL, Spark
- **Concepts:** NLP, Computer Vision

Professional Experience Data Scientist | Global Analytics Ltd.

- Performed **data cleaning** and preparation on large datasets using **Pandas** and **Spark**.
- Developed a **computer vision** model using **TensorFlow** for object detection.
- Collaborated on a project involving **natural language processing** to analyze customer feedback.
- Utilized **Scikit-learn** to build various machine learning models.

How to Use This:

1. Copy the text for the **AI/ML Engineer JD** into your web application's job description field.
2. Copy each of the three resumes into separate `.txt` or `.pdf` files.
3. Upload the JD and the three resumes.
4. Run the ranker.
